AHMAD ZIDNI ROSADI

Summary

I am a web developer with expertise in using the Laravel framework. I have worked on several projects, including developing APIs and admin dashboards. Additionally, I am proficient in ReactJS, jQuery, Tailwind CSS, and Bootstrap for styling websites. As a backend developer, I have experience creating APIs using ExpressJS and NestJS.

I have also participated in numerous programming workshops and training sessions. I am passionate about continuously learning and exploring new advancements in the world of programming.

Work Experience

Web Developer - Apprentice
 Udacoding, March - September 2022
 Description:
Created several articles to populate the Baraja Udacoding blog, organized free and   paid workshops, and also conducted offline training in Sabah, Malaysia.

Permanent Employee (Full-time Onsite)
 Udacoding, September 2022 - Present
 Description:
Frequently use Laravel for work, ranging from creating APIs, developing web management dashboards, to providing programming language training and organizing programming workshops.

Backend Developer - Freelance (Remote)
 Unity, August - December 2022
 Description:

Developed an API using NestJS and GraphQL with features such as image uploads and a websocket for creating real-time chat applications.

Backend Developer - Freelance (Remote)
 Ride Runner, August 2023 - Present
 Description:

Developed several APIs and management dashboards for the Riderunner application, which operates in the online driver, goods delivery, and related industries.

Web Developer - Freelance (Remote)
 LCP Nastah, July - September 2023
 Description:

Developed several features for an already running website using the Laravel framework, and used JQuery and DataTables for web interactions.

Full Stack Developer - Full-time (Remote)
 Udacoding - MIG, December 2022 - August 2023
 Description:

Developed a management dashboard from scratch and created several APIs for mobile applications. The website includes features like map implementation, import/export, live search with DataTables, and permission management based on the user's position within the company.

Full Stack Developer - Full-time (Remote)
 Talamidz Developer, February 2023
 Description:

Talamidz Developer is a software development service where I worked as a full-stack developer responsible for writing code for the application.

Full Stack Developer - Full-time (Remote)
 Udacoding - BPD Desa IT, September 2023 - December 2024
 Description:

Developed a landing page and an admin management dashboard for Desa IT. For the landing page, I used an API to fetch data from the backend, and for the admin dashboard, I created CRUD functionality using Ajax.

Full Stack Developer - Full-time (Remote)
 Udacoding - LCP Buildsoft Technology (M) Sdn Bhd, December 2023 - Present
 Description:

Maintaining and developing websites using the Laravel framework, such as an inventory management system and game management system.

Full Stack Developer - Full-time (Remote)
 PT Perintis Kode Global, May 2025 - Present

Description:

Create a project or add features to an existing project using CI3, CI4, PHP and Laravel
